

Joan Alegre Canton

Economist

Economist and PhD Candidate with expertise in econometric theory and structural modeling applied to industrial organization. Skilled in designing methods that improve the robustness and accuracy of structural models. Proven experience in teaching and presenting research in international settings, with strong communication and analytical skills. Highly adaptable to interdisciplinary and multicultural environments, with a proactive approach to professional development.

EDUCATION

2021-2025

Ph.D. in Economics

Universidad Carlos III de Madrid

Supervisor: Prof. Juan Carlos Escanciano

Expected Defense: December 2025

Madrid, Spain

2019-2021

M.Sc. Economic Analysis

Universidad Carlos III de Madrid

Madrid, Spain

2017-2019

M.Sc. IDEA

Universitat Autònoma de Barcelona

Barcelona, Spain

2012-2017

B.Sc. Economics

Universitat de Barcelona

Barcelona, Spain

WORK EXPERIENCE

2020-2025

Teaching Assistant

Carlos III University of Madrid

Teaching assistant for the courses Mathematics I, Mathematics II, Introduction to Optimization, Labour Economics (Bachelor level), Introductory courses of Mathematics, Mathematics, Linear Algebra (PhD level).

Madrid, Spain

RESEARCH

• Theoretical Econometrics (Working Papers):

- [What to Fix and What to Estimate in Structural Economic Models](#). *Job Market Paper*.
- [What to Fix and What to Estimate in Bayesian Structural Economic Models](#).
- [Robust Minimum Distance Inference in Structural Models](#) (with Juan Carlos Escanciano).

• Applications:

- **Industrial Organization:** Robustness improvement and estimation of a Dynamic Discrete Choice model for the exit/entrance decision of a firm. Estimation and robust inference of a static Bayesian Game modeling the exit/entrance decision problem of two firms.
- **Macroeconomics:** Robustness improvement and estimation of a Bayesian Dynamic Stochastic General Equilibrium Model. Development of a Dynare package implementing the new econometric methodology.

CONFERENCE PRESENTATIONS

ENTER Jamboree (Mannheim 2023, Brussels 2024); Annual Spanish symposium (Salamanca, 2024); ENTER Presentation (Tilburg 2024, Toulouse 2025); EAYE Annual Meeting (Oslo, 2024).

INFORMATION TECHNOLOGY SKILLS

Programming

MATLAB, Python, Julia.

Office

ElleX, MS Office (Excel, Word, PowerPoint).
